WHITTIER COLLEGE ALUMNI ASSOCIATION

OFFICERS

Thomas V. Deihl '47, Whittier, *President*; Eugene M. Marrs '50, Whittier, *President-elect*; Kenneth L. Ball '34, Whittier, *Immediate Past President*; and John R. Cauffman '45, Whittier, *Past President*.

MEMBERS AT LARGE

Stephen A. Gardner '40, Los Angeles; Ray S. Dezember '53, Bakersfield; Stanley G. Alexander '48, Santa Ana; Dr. John D. Kegler '38, North Palos Verdes Estates; and Gale R. Brandon '50, Fullerton.

CLASS REPRESENTATIVES

Mrs. Jerry D. Cederstrom '63, La Habra; Judith Ann Shuler '64, Santa Ana; and Kenneth Hunt '65, Yucaipa.

COMMISSION CHAIRMEN

John A. Arcadi, M.D. '46e, Whittier, *Alumni Fund*; Mrs. Kenneth Deitz '60, Whittier and Mrs. R. Bradley Schartz '60, La Habra, *Activities co-chairmen*; Stephen A. Gardner '40, Los Angeles, *Publications*, and Richard H. Thomson '34, Whittier, *Student-Alumni Relations*; Dean E. Triggs '33, Ventura, *Education*.

ASSOCIATES PRESIDENT

William F. Krueger '33, Bell.

CLUB PRESIDENTS

Arvle B. Dedmon '42, Whittier, *1195 Club*; Mrs. Larry M. Krogh '63, Whittier, *Cap and Gown Alumnae*; Alice C. Lembke '40, South Pasadena, *Broad Oaks Alumnae*.

SOCIETY PRESIDENTS

Mrs. John Baker '57, Whittier, *Athenians*; Mrs. Ronald Rogers '57, La Habra, *Ionians*; Mrs. Hollis Griffin '60, Costa Mesa, *Metaphonians*; Mrs. Kendall Bowlin '55, Whittier, *Palmers*; Miss Lela Martin '64, Whittier, *Thalians*. John W. Brink '56, Whittier, *Franklins*; Stuart Gothold '56, Whittier, *Lancers*; Elwyn B. Dyer '50, Los Alamitos, *Orthogonians*; Robert Davis '62, Los Angeles, *William Penns*; and Jack W. Baker '59, San Gabriel, *Sachsens*.

EX-OFFICIO

Dr. Paul S. Smith, President, *Whittier College*; Geoff Shepard '66, President, *Associated Students*; Dr. Robert W. O'Brien, and Dr. W. Roy Newsum '34, *Faculty Representatives*.

ALUMNI REPRESENTATIVE TO THE ATHLETIC BOARD OF CONTROL

Thomas V. Deihl '47, Whittier.

THE ROCK STAFF

Donald C. Bishop '61, *Editor*; Milt Stark '58, *Sports Editor*; and Paul Lewis '66, *Designer*.

THE ROCK is published quarterly during the months of September, December, March, and July by Whittier College in the interests of the Whittier College Alumni Association. Second class postage paid at Whittier, California. Send changes of address to the Whittier College Alumni Association, Whittier, California, 90602.

In recent weeks several students from Whittier, Scripps, and Occidental Colleges participated in a series of three College Report Programs designed to give them the opportunity to air their views on matters important to them. The discussions were spontaneous and centered on the problems of campus living and studying, current off-campus activities of students, and morals today and tomorrow. As each discussion went on a panel, consisting of the deans of students at Scripps and Occidental and myself, listened in and during the last few minutes of the half-hour commented on what we had heard. The programs were well received and provoked favorable comments along regular viewers, friends, and neighbors.

Joe college speaks

Several observations could be made about these televised bull sessions but I would like to restrict my remarks to some matters which were not evident to the viewer. Behind-the-scenes events including the breakdown of Camera No. 1 on one occasion, the rise in tension in one group causing them to drop voice level below the sensitivity of the lapel microphones—necessitating a fresh “take”—and other incidents usual in such situations are not our concern here. Rather, the attitudes, values and feelings of the participants not obvious to the viewer shall be discussed.

First is the fact that several of the students who discussed the student demonstrations now receiving widespread publicity are themselves quite active in the civil rights movement, but in ways somewhat different from the behavior of their more notorious fellow students on other campuses. For example, one Whittier student has worked many hours organizing fund-raising activities, collecting school texts, and recruiting teachers to constructively build a better system of education in the south. Another has patiently organized discussion groups on campus for the purpose of probing into current social issues with

student-faculty participation. Other instances could be cited but the point is clear: Many college students today are actively concerned with the "outside world" in constructive and reflective ways that go beyond marching, shouting and civil disobedience.

In general, as one panelist put it, today's students don't seem to have as much "fun" as the now stereotyped racoon-coat-wearing, flask-toting, rah-rah collegiates of the past. It is true, of course, that for some going to college is essentially a protracted mating process; for others it is primarily a necessary step in status achievement; and still others find it preferable to some of the jungle-like characteristics of "living in the modern world." On the other hand, the increasing rate of suicide attempts and successes among college students points up the occasional overwhelming effects of the seemingly cloistered college life which nevertheless remains continuous with the stresses of contemporary living. In between are an increasing proportion of students who welcome the opportunities afforded by college living to analyze and to understand the proliferation of complexity that characterizes the personal and social adjustments of our time. These students are not having less "fun," they are more sophisticated in their tastes and values. They illustrate well that history and psychology are inseparable; that human nature is not fixed but in and of the historical process; that "history" does not act upon people, but rather, that developing human beings *are* history. This truth, discovered by the more reflective student, catches him up in the processes of reality; he knows that going from *being* in contemplation to *becoming* in action, and vice versa constitute the basic rhythm of significant living. This natural desire to live significantly, once awakened, manifests itself in the thoughts and actions of human beings wherever they may be. In the college student it is evident in his efforts to live significantly as a student. The emerging pattern of attitudes and values constitutive of this striving is worth commenting upon.

Dr. Harry G. Schrickel is Chairman of the Department of Psychology and Professor of Psychology. Dr. Schrickel was appointed to the Whittier faculty in September, 1962 coming from the State College of North Adams, Massachusetts. He holds a B.A., M.A. and Ph.D. degrees from the University of Cincinnati. He also has taught at the University of Nebraska, University of Cincinnati, and the Carnegie Institute of Technology. He is author, and co-author of several books and journals.

Editor

Educators in the field of higher learning agree that an increasing number of college students are taking an evaluative position regarding the educational processes they are participating in. In the larger colleges and universities where the *mass* features of much higher education are pronounced students have shown signs of deep and widespread frustration with what is going on in these institutions. Discontent, in varying degrees, is more or less universal, however. Rating of instructors, criticism of course contents and methods, demands for more student participation in curriculum designing, and other student activities are part of what could be a revolution in higher education. Such a revolution is long overdue and student agitation is symptomatic of this lag.

The students in the College Report discussions are representative of the larger reflective-active group we have been describing. Listening to the three sessions, one went away with the definite feeling that many students are dealing directly with the ambiguities and conflicts of contemporary life which extend beyond academia. These students have inherited ill-defined roles, roles which they are expected to fulfill with a minimum of cues from those already in these roles. For example, what does it mean to be a woman? A citizen? A parent? Each generation faces such questions, but has there ever been before such a paucity of straightforward, culturally universal answers? In other words, students today not only have the task of developing personal definitions—as has always been true—but they must also define standards for their generation in a world undergoing social changes unprecedented in rate and extensity. No wonder they seem more introspective and less extraverted than most of their predecessors!

Turning inward for answers and away from their elders is not new among young persons; the need for new values characterizes this stage in development. Yet it must be observed that there is more in current conditions to accentuate this inward-turning and rejection of the older generation than has often been the case in more stable societies. Looking within is necessary and, in an important sense, it has always been one of the functions of higher education to cultivate and to refine such processes. Unfortunately, when it becomes preoccupying over protracted periods of time the introspectionist might come to prefer his fantasies to reality and then schizophrenic withdrawal becomes the way of life. There must be outward-turning and active participation in life to achieve the dynamic equilibrium and psychological health of significant living. It becomes then the responsibility of the elders—or rather, of the power-wielding middle-aged with their tendencies toward maintaining the status quo—to provide opportunities for the young to actively participate in the determination of their lives. This is no easy task, yet it is unavoidable if the young are to achieve their humanity. Relative to the

young, when to hold on and when to let go is the problem of middle-age. To reject this problem by insisting upon conformity in the young can only encourage destructive rebellion or sterile apathy. Rather the solution lies in nurturing creativity in the young people and in helping them to learn the self-discipline necessary to the execution of one's own ideas.

The performance of the particular students involved in the College Report series is significant beyond the momentary interest it aroused. These students are part of and representative of that growing segment of the college population who show potentialities of becoming superior human beings. It is this group toward whom higher education should be directed. Higher education too frequently today is essentially a status-manufacturing process which provides the graduate with a badge admitting him to certain social circles and to industry training programs where his higher education really begins. The superior student, who can profit most from college, wants more than status. Sometimes he knows not only what he *wants* but also what he *needs*. On other occasions he knows what he wants but is not too conscious of what he needs. In any case, he is worth listening to and he is justified in his demands to be heard. This is a complex of student-faculty problems, for a college is basically a community of maturing and matured scholars. The function of the administration is to provide adequate facilities for the achievement of goals developed out of student-faculty interaction. To the degree that all are contributing efficiently, intellectual growth of the entire academic community is assured. ■

ROUND PEGS

FOR ROUND

Placement Service Expands

Three new interview rooms have been established on the first floor of the Walter F. Dexter Student Center enabling Whittier College to give improved service to seniors and alumni seeking career placement and to some 60 employers representing business, industry and government agencies who are visiting the campus this Spring.

The larger of the three rooms doubles as a placement library, according to Jane T. Randolph '43, Director of Placement. Brochures describing the needs of approximately 100 employers are available in the placement library, helping seniors to prepare well for their interviews with company representatives and providing underclassmen with information which is of aid in choosing a career. Literature concerning graduate schools, the Armed Forces, the Peace Corps and VISTA is also available, as are announcements concerning summer employment.

While campus interview visits reach a peak in the Spring, the interview rooms are used throughout the year to accommodate representatives from graduate schools, and the Armed Services as well as career and part-time employers. With an increasingly greater percentage of seniors continuing their education in graduate schools, interviews with representatives of these institutions attract much interest.

A large bulletin board listing part-time employment opportunities is continually watched by students seeking jobs to help defray expenses. Job descriptions are posted, the student informs the placement staff of the job which interests him, and if he is a qualified candidate he is given a referral slip to the employer. Close contact is maintained with the student and the employer to ascertain satisfaction. ■

Grad Systems Available

"Now every experienced graduate can put his qualifications before employers from coast to coast—with computer speed and at nominal cost."

So says Jane T. Randolph, Director of Placement, who makes no effort to hide her enthusiasm for a new service her office is making available to Whittier College alumni.

Whittier graduates who have gone through the frustrating business of circulating resumes to employers and then awaiting results can appreciate what the new service—known as the GRAD system—can offer. Employers, for their part, will find it eye-opening to be able to search the qualifications of thousands of candidates in mere seconds. The 21 major search items available to employers are teamed with a thesaurus of occupational skills so extensive that the College Placement Council believes it the most sophisticated means of selection yet devised.

UNID HOLES

Key to the dramatic new system is the College Placement Council's role as the corporation placement directors and employers formed a decade ago to assist themselves in doing a better job for the student and alumnus. In the CPC, as it is commonly known, over 1,000 colleges and universities together with more than 2,000 employers of the United States and Canada foster cooperation between campus and company through such projects as the GRAD program.

Gone for candidates under the new service are such problems as how to make their qualifications known to a broad spectrum of employers or how to avoid the onerous and time-consuming business of mailing numerous resumes and then awaiting results. Employers, for their part, are finding that experienced college graduates may be located with remarkable selectivity, in record time, and at nominal cost. That the employer is in New Orleans, the placement office in Whittier, and the alumnus in Salt Lake City no longer matters.

In operation, the GRAD system is uncomplicated (the name, by the way, stemming from "Graduate Resume Accumulation and Distribution"). An alumnus interested in finding new employment communicates directly with the Whittier College placement office. If the placement director feels that the GRAD program will be of value to the individual in question, the candidate is given an instruction sheet and four-page resume form. The alumnus has the resume completed and neatly typed since it will be photo-copied in its original form for distribution and sends it to the College Placement Council in Bethlehem, Pennsylvania, with a \$10 service fee.

At the data center of the Council, each resume forwarded by an alumnus is analyzed both in terms of present (or most recent) employment and of previous experience. Twenty-one key factors are extracted from the information and entered into an electronic file at a vast computer center some 60 miles from the Council offices in Bethlehem, Pa. The original resume is microfilmed to be retrieved almost immediately upon receipt of an employer order.

In a typical use, an employer may inquire for applicants on the basis of six or eight selectors—all in English since the system does not require codes. Hardly has his question been completed on the teletype when the machine begins to chatter in response, and he is told, for example, that 83 alumni whose qualifiers are in the system, meet his specifications. This is more than he bargained for, but no matter. The inquiry is restated with more stringent requirements and the number of qualifying applicants now drops to 17. Satisfied, he types the order to send

resumes on the chosen candidates.

Here another sequence of events takes place with remarkable speed. The employer's order is electronically relayed to the Council data center where resumes corresponding to the chosen individuals are retrieved, duplicated and speeded on their way to the employer. From this point on, negotiations are traditional with the employer contacting those applicants whose experience, as amplified by the full resume, meets his needs. Before, during, or after the use of the GRAD system, alumni are free to call upon the placement office for counsel.

Use of the GRAD system is not available to just anyone. Since its designers were aware that misuse of the system for "looking around" or job-hopping would detract from its value to employers, placement directors must endorse each resume and attest to the fact that the applicant has received a four-year degree or higher.

Special provisions have been programmed into the GRAD system whereby the applicant's current employer is blocked electronically from receiving resumes. In a similar precautionary measure, employers may make their electronic search of selector factors in terms of state of residence but not city. Thus the geographical selector does not reveal the present employer accidentally when the applicant is a resident of a "one-industry" town. Further confidentiality is provided by maintaining only in the CPC data center file the names and addresses of alumni applicants and the identity and addresses of participating employers. All communication with the remote storage file is on an identification number basis, meaningful only to the staff administering the GRAD program.

The key to the effectiveness of the system is one of the most inclusive thesauruses yet to be devised. Because of the College Placement Council's representation of employers as well as colleges and universities, skills banks developed by major manufacturers and business firms were donated to the Council and combined into a source book of thousands of entries. In practice, each resume will be studied first to extract the most inclusive job descriptor. It will then be further assessed to determine 21 additional selector elements. Major items among these include: state of residence, marital status, major fields studied in college and type of degree received, class rank by quintile, present and required salary, area of job interests, geographic preference, language proficiency, and several others of lesser importance. Any combination of these may be used by the employer in making his search.

Research data resulting from the operation of the GRAD system will be available to all participating placement offices. Some of the areas of study being considered are concentrations of employer interest in terms of specific qualifications, supply and demand by various classifications, salary trends, etc. All of these can be computed with ease and maintained on an up-to-date basis. Thus the project not only places opportunities of an unparalleled scope before the Whittier alumnus but promises to make the Poet placement office a prime information center for real-time manpower statistics. ■

The Green Arrow

By MILT STARK '58
Rock Sports Editor

The Green Arrow has finally hit the bulls-eye! Or maybe it's a Ram's eye.

This would be so much Greek to the general sporting public, but to a group of Whittier College football alumni it simply means that ex-Poet mentor George Allen is now the head coach of the National Football League's Los Angeles Rams.

You may have noticed the similarity in the G. A. initials which are an inside joke with the Poets who played under Allen during his six-year tenure at Poetville.

And so — the Whittier College football coach with the poorest won-lost record in the past 35 years has become the most successful. That is, if you use controversy, nationwide publicity, and financial income as standards.

This certainly isn't meant to jab Allen's coaching ability. It simply points out the tremendous success enjoyed by Whittier College football teams over the years.

Men like Wallace (Chief) Newman, Don Coryell, and John Godfrey stand in the front rank when success stories are told; but Allen hit the headlines of the nation's newspapers early this year and hit a monetary jackpot

when he signed with the Rams amid a cloud of controversy.

Allen came to Whittier College in 1951 as an untried, handsome young coach to take over for the popular Newman who had headed the Poet grid forces since 1929. Allen was only seven years old when the Chief took over the Poet reigns. Today, at 43, he holds one of the most important football coaching jobs in the land—that of pulling the once-proud Rams back into the NFL winner's circle.

In his six years at Whittier, Allen guided the Poets to 32 wins, 22 losses, and five ties—that's a 59.3 winning percentage. Newman's record was a leap ahead at 60.7 with 102 wins, 66 losses, and 14 ties.

Coryell's three seasons produced a fabulous 23-5-1 record and a winning mark of 81 percent. Godfrey, in his six seasons, has racked up 44 wins, only 12 losses, and has settled for one tie. His winning percentage is 78.6.

Since 1924 Whittier College has played 327 football games and enjoys a healthy 65.7 average. The record shows 201 victories, 105 defeats, and 21 deadlocks.

Allen will reportedly be making close to \$40,000 per year in his new post, twice as much as George Halas paid him as a Chicago Bear assistant. Even if he can bring the Rams home with more wins than losses, he'll be

worth it to millionaire owner Dan Reeves.

Of course, he may bring his pros along like he did the Poets—slowly. In his first year at Whittier, the Poets suffered through the worst grid season in the college's history—only two wins and seven crushing defeats.

But the very next year Allen had the Poets back on top of the Southern California Intercollegiate Athletic Conference as they blitzed through a 9-1 season. Allen's other season marks look like this: 1953, 6-3-1; 1954, 3-6-1; 1955, 8-2; and 1956, 4-3-3.

In a surprise move, Allen left Whittier College in the spring of 1957 to accept an assistant's position with the Rams. After a couple of years in Los Angeles, he moved on to Chicago where in 1963 he was heaped with praise for designing the defense that stopped the mighty New York Giants and won the NFL championship for the Bears.

Fifteen years ago George Allen was a 28-year-old neophyte in the rigorous business of coaching football. Nearly half of those years he spent experimenting, learning, and maturing in the Whittier College atmosphere. Today is he at the top of his profession. Whittier has a traditional history of success in football activities, and the college can be proud of the part it played in the speedy, accurate flight of the Green Arrow. ■

after 38 years...

More than 500 people, many of them top names in American sports, gathered recently in the Embassy Room of the Ambassador Hotel in Los Angeles to pay tribute to a man who has devoted his life to young men and athletics.

And what a satisfying life it has been! As the man puts it, "If I had it to do all over

again, I'd follow the exact same path."

After 38 years as football and baseball coach at Fairfax High School in Los Angeles, Frank Shaffer '25 has hung 'em up.

Shafe, as he is affectionately called by those closest to him, came to Whittier College from Topeka, Kansas, in 1921 and went on to become an all-time outstanding Poet athlete.

"I'll never forget my first football game as a Poet," says Shaffer. As a 6-4, 190-pound freshman tackle, Frank was forced into the Pomona game that year when regular Paul Pickett was sidelined with an injury.

"We had a fine team that season," Shaffer recalls. "We lost only to USC and Arizona and won the conference championship. Fellas like Ed Suggett, Puss Thompson, Mick Maden, and Joe Buckmaster were outstanding football players. Coach (Eck) Perry told me to get in there and stay low and hit hard. I was scared to death," admits Frank, "but I learned a lot about football that day, and although Pomona was a powerhouse in those days, we beat them 42-9."

Frank was a first baseman on the Poet baseball team. His biggest thrill in that sport came when he drove in all three runs off Occidental pitcher Bud Teachout as the Poets trimmed the Tigers 3-1. Teachout went right to the Chicago Cubs from Oxy.

An honor-filled college athletic career was capped in 1924 when the Whittier football captain was named on Walter Camp's All-American honorable mention list.

After graduating from Whittier in 1925, Shaffer spent two years obtaining a Bachelor of Physical Education degree at Springfield College in Springfield, Massachusetts.

In 1927 he returned to California and took over the coaching assignments at Fairfax.

While at Whittier Frank didn't spend all of his time tackling opposing ball carriers and hitting line drives. He met a young lady named Mary Chambers '26. Miss Chambers later became Mrs. Shaffer and an inspiring

and steady influence behind Frank's work. Mary, also a teacher, retired from the Los Angeles City School system in January along with her husband.

The Shaffers have two offspring, Don '58 and Mrs. Mary Lynn Caldwell. Don was a pitcher for Chief Newman in the late '50's; Lynn graduated from San Fernando Valley State College in 1959. Both are married and are busy producing grandchildren for Mary and Frank to spoil in their retirement years.

Shaffer has always been an active Whittier alum. From his many outstanding Fairfax teams he sent such names as Joe Gaudio, Carl Seigman, Beryl Nothoff, Ed Sowers, Everett Hunt, Don Uglow, Chuck Lewman, and Howie Reisbord to Poetville.

A list of names of the lives influenced by Shaffer reads like a "Who's Who in Sports." There's Jack Kemp, Jim Hardy, and Jim Kisselberg in football; successful coaches such as Bob Zalinka (Oregon State), Art Reichle (UCLA), and John Stonebraker (Mt. SAC); and major league baseball stars George "Tuck" Stainback, Clarence Kumalai, Ralph Harrison, Lefty Laurence, Wally Hood, Norm and Larry Sherry, Chuck Essegian, and Barry Latman. One of Frank's most recent pro-

teges, Mike Epstein, was named minor league player of the year last season when he led the California League in batting average, home runs, and RBI's. Epstein is with the Baltimore Orioles this spring.

At 63, Shafe is as spry and active as a man half his age. "I'd have to go back to the very beginning for my most memorable coaching experience," he says with a gleam in his eye. "I coached the lightweight football team that first year, and they were so good we beat the varsity 18-6. That team was led by Carl Seigman. (Seigman later played at Whittier.) They were very coachable and just loved to play the game.

"I've enjoyed all those 38 years. Now, I'd like to spend more time watching Whittier teams play. Things are so much different now, but I still have strong sentimental feeling for Whittier. You know, the enrollment was only 185 when I was in college, and we played all of our games, both football and baseball, on Hadley Field.

"Now the college has beautiful athletic facilities. I'd like to see lights at that new stadium soon."

"My only complaint is this. Whittier has enjoyed a great deal of success in athletics, but I don't feel they have capitalized on it. I guess you would call it a breakdown in public relations. I thought the football television coverage in 1964 was good. Everybody was talking about Whittier's fine football team that year because of the public exposure."

Frank and Mary would like to see all their old Whittier College chums, and after April 15 they can be reached at their beautiful new home in Laguna Hills Leisure World, 1718A Avenida Majorcia.

"You can find me on the golf course," says Frank. "I'm not much of a golfer, but I'm gonna have a lot of time to improve." That's a typical modest statement by a man who has always shot them straight and true and has been better than a par shooter in whatever game he played. ■

Old ACQUAINTANCES

News of Alumni by Classes

'07

Erema Newby Armitage of 13260 El Dorado Drive, 188-M, Seal Beach, is now living with her mother. Her mother, Clara Newby is 104½ years old, and a pleasure to all who know her.

'10

Dr. Herbert E. Tebbetts was honored as a charter member of the Whittier Rotary Club, organized in 1922.

Mrs. Cora Scheurer Laport had a wonderful 31 day trip in New Zealand, Australia, Tahiti, and the Fij Islands with a group. She is now living at 29-04 Meadow Lakes, Hightstown, New Jersey.

'11

Mr. Samuel C. Pickett retired as the Insurance Rating Supervisor for the State of Connecticut. In the beginning of March, his new mailing address will be P.O. Box 237, Poquonock, Conn.

'13

Mr. and Mrs. Jesse A. Stanfield of Clintondale, N.Y., enjoyed the hospitality of Henry and Olena Whitlock ('13) while in Southern California recently. Mr. Stanfield attended a Quaker Men's conference in Whittier, while Mrs. Stanfield attended the United Society of Friends Women's conference at the same time.

'14

Almeda Nordyke is active as the treasurer of Lake Co. Div. Retired Teachers and Lake Co. United Church Women. She is also serving as historian for the "Trowel and Trellis" Garden Club.

'21

Mr. Teauy Ulrey Hawley has retired after 42 years of science teaching at Excelsior High School in Norwalk. He and his wife, Hazel Sutton Hawley ('22), are living at 14403 S. Grayland Avenue, Norwalk, and spend much of their time at their desert cabin or traveling.

'22

Warren O. Mendenhall was saluted by the Garden Grove Unified School District by their naming a new high school in his honor. Mendenhall has been active in professional groups serving the mentally retarded and exceptional children.

'23

John Willard Kramar is currently serving as Southern California area treasurer for the National Educators Fellowship, a Christian teachers organization.

'24

Mr. Walter Jessup is in his second year of retirement after 39 years of teaching, 26 of which were spent in Oxnard Union High School District. Since his retirement, he has toured the U.S.A., Canada, and Europe. Finally, last September through November, he travelled completely around the world.

'25

Esther Stubbs Canfield and husband Merritt have retired from medicine but for two years have gone to mission hospitals to relieve doctors or fill a shortage. They have just returned from Hospital of American Samoa in Pago Pago.

Rev. Harold R. Cunningham completed 10 years as Chaplain of the V.A. Hospital in Indianapolis. He is vice-president and program chairman of the Indianapolis Ministerial Association.

'26

Alex Clark is now an oil consultant living in Alberta, Canada.

'27

Dorothy Dykstra Orr is President of the Kern Division of the California Retired Teachers and is serving in her fourth year as an American Red Cross Gray Lady at Kern General Hospital.

Wilma Goe Fink is District Art Coordinator in the San Gabriel School District and is a member of Delta Kappa Gamma.

Mrs. Ruth Wheatland Bagwell was a nominee for the annual Honor Citation presented by the Bismarck Art Association in North Dakota. Mrs. Bagwell retired this year after many years as an art instructor in the Bismarck public school system.

'28

Mrs. Doris Bayard Webster is teaching kindergarten in Glendale. Her husband, W. Alden Webster, is an Insurance broker in Sierra Madre. They have three children, all college graduates, and six grandchildren.

C. Merton Johnson is head Counsellor at Roosevelt High School in Los Angeles. His wife, Peggy (Keating '30), is a First Grade teacher in Mountain View District, El Monte. They enjoy their summers in Corona del Mar.

'30

Lois Patterson Anderson and husband, Howard, have returned from eight years in Iran where Howard was an exploration geologist for the Iranian Oil Exploration and Producing Company. Their California home is now at 4465 9th Street in Riverside, 92501.

Irma Meyer Hardenburgh is teaching homemaking at Columbia School in El Monte.

Everett C. Schneider and wife made a missionary tour of Puerto Rico last July combined with their vacation.

George Ringland is now Chairman of the Language Arts Department at Citrus College. He is also serving as Chairman of the Personnel Standards and Ethics Commission of Southern California Teachers Association.

Alice Myers Castell is teaching 4th grade in Phoenix, Arizona. Her son, Larry, is in the Navy.

Leon Lee has retired from teaching, after 22 years as English and history teacher at Livingston High School and eight years as principal.

Mildred McFarlane Hyde and her husband visited their daughter in Alaska and their son in the Air Force in Tucson, Arizona.

Yone Kuwahara Sugahara is living at 1471 Roosevelt Place, Pelham Manor, N.Y. Her husband is President of a ship company and her twin sons are in the Armed Forces after attending Harvard.

Fumi Gordo is a private secretary to a Colonel in the Air Force. She lives at Berkeley Towers 52-40, 39th Drive, Woodside Long Island, N.Y. while her son, Dexter, attends the University of Chicago.

Juan Valverde Reyes has lived in Cuernavaca since 1940 as an authorized guide and specialized teacher of English and Spanish. He would like to hear from friends of the Cosmopolitan Club, at Avenue San Jeronimo 309, Cuernavaca, Morelos, Mexico.

'32

Mr. and Mrs. Tolbert B. Moorhead (Virginia Keasbey '33) have opened a new company, "Moorhead Mortgage Co." in Whittier. Mrs. Moorhead is the current President of Whittier College Women's Auxiliary.

Donald M. Nelson has been named General Manager of the Southern California Packaging Division of Fibreboard Paper Products Corporation.

'33

Mr. Harold A. Space has retired after fourteen years employed as an engineer in Saudi Arabia with the Arabian-American Oil Co. He is now residing at 12732 Dean Street, Santa Ana, California.

Max Goldman has moved to California after 7 years in New York and now resides in Beverly Hills.

Elizabeth Takahashi Nishikawa and her husband returned from a trip around the United States where they visited sister Quaker college campuses and visited the A.F.S.C. office in Philadelphia.

'34

Mr. and Mrs. M. E. Mashburn (Barbara Rees) are cruising the South Pacific this Spring. Mashie recently sold his power tool business and is dealing in real estate and insurance again.

George E. Kellogg retired as Physical Director of the Long Beach YMCA and is now working in the Whittier College Athletic Department Equipment Room.

Ralph D. Rich is a teacher at San Fernando High School in Los Angeles.

Mabel M. Bumgardner is Co-ordinator of Instructional Material Services in the Cupertino Elementary School District in San Jose. She is presently president of the Zeta Eta Chapter, Delta Kappa Gamma.

F. Louis Valla has been transferred to the regional office at Terminal Island. He and his wife (Adella Hayes, '33) have bought a home at 5325 Las Lomas St. in Long Beach, 90815.

Class of '54

Richard L. Tracey, December 7, 1965.

POET PROMENADE

Geology Department Acquires Aerial Survey Maps

The geology department at Whittier College has acquired a collection of stereoscopic aerial photos taken from 1929 to the present by Fairchild Aerial Surveys.

The collection includes the photography involved in 600 flights over all of California, according to F. Beach Leighton, department chairman. Older photos, when compared to present-day ones, are of great value in comparative studies in hillside stability, geographic development and geomorphic history.

The college geology department has also become a depository of publications from the U.S. Geological Survey, and recently received many valuable publications from donors, including W. A. English, Milan Arthur and F. Honeyman. Through the efforts of Keith Green, paleontology instructor, and Joe Clements, laboratory assistant, the department has built reference collections of micro-fossils and mega-fossils. ■

Alumni Fund Progress Report

As of March 1, 1966, 803 Alumni and Friends have given and pledged \$29,204 to the current Alumni Fund it has been announced by Dr. John A. Arcadi, '46e Alumni Fund Chairman. This compares with \$24,279 given by 647 alumni in last year's fund drive as of March 1. In the 1964-65 campaign only 12% of Whittier's nearly 10,000 alumni contributed to the fund. This compares with 38% that supported the Occidental Alumni Fund over the past 3 years and Pomona College had 31.7% participation last year.

In 1964-65 the Whittier Alumni Fund totaled \$36,485 from 12% of our alumni body. Compare this with Redlands University who had 15% participation but total giving in their alumni fund of \$527,000. Have you done your share?

Faculty Notes . . .

Margaretha Lohmann, chairman of the Whittier College music department, is president of the California Music Executives Association. The group is composed of all music department chairmen in colleges and universities in the state.

Robert Gaal, instructor in Geology at Whittier College, has received a Ph. D. in Geology from the University of Southern California. He has a B. A. from UCLA and a M. A. from USC. At present he is engaged in research projects with Northrup Space and Planetary Physics laboratories on the utilization of lunar materials, and with the Los Angeles County Museum of Natural History on minerals from the sea.

Jeanne L. Bergstrom, visiting lecturer in art at Whittier College, arranged and moderated a series of dialogues on the relationship of the arts and religion at Hillcrest United Church of Christ, Whittier. Participating from Whittier College were Elnora Laughlin, professor of art; Wendell Hook, chaplain; Malcolm Farmer, instructor in anthropology; Robert Tresser, drama director; Alyss Sutton, modern dance director; Harry Schrickel, psychology chairman, and Herbert Larsen and Keith Rholl, sociology professors.

Albert Fung, instructor in physics at Whittier College, attended the National Science Foundation institutes at Oklahoma State in electronics, Kansas University in physics, Louisiana State in radioisotope technology, UC Berkeley in physics, and Louisiana State University, the latter a conference on quantum mechanics.

Cora Miller, chairman of home economics at Whittier College, was chairman of the nutrition conference at the Huntington Sheraton, Pasadena, sponsored by the Southern California Institute of Food Technologists in collaboration with the Nutrition Foundation of New York City.

Carl Stutzman, instructor in education at Whittier College, is a representative of private and independent institutions on the executive board of the California College and University Faculty Association. The group has 1200 members representing 57 senior colleges and universities.

Dr. Beach Leighton, chairman of the Whittier College Geology Department, recently received a commendation from the Orange County Board of Supervisors for his service as chairman of the Board of Qualifications for Engineering Geologists for the past three years. Dr. Leighton was cited for "willingly giving his time in the fair and effective adminis-

tration of the Excavation and Grading Code of the County of Orange and for demonstrating the highest degree of public spirit." Dr. Leighton has been with Whittier College for the past 15 years and has served the past five years as chairman of the department of Geology.

Dr. Eugene Gloye, associated professor of psychology, recently served as a member of the accrediting team visiting Palomar College, San Marcos, to determine the school's continuing accreditation with the Western Association of Schools and Colleges.

Ivan Guevara, assistant basketball coach at Whittier College, has published an article entitled "Selecting A Defense" in a book just released by Prentice Hall publishers and authored by Tom Tarleton, head basketball coach, Tuscaloosa, Alabama, high school. The book was named book of the month by the Coach's Book Club.

Charles Montgomery, dean of students at Whittier College, has received a Ph. D. degree at the University of California, Berkeley. His doctoral thesis is "The Evolution of the Intermediate Unit in Contra Costa County, 1852-1962," a study of the history of the development of public education in Contra Costa County, California. He is at present writing for Rand, McNally a workbook to accompany a new American history high school text, "The Brave and the Free," together with Dr. Thomas Metos of the University of Arizona.

Mrs. Isis Molina de Galindo, instructor in Spanish has received her Ph. D. degree from UCLA. Her thesis was on "Impressionism" in Jose Marti and was the first doctoral dissertation written in Spanish on this subject at UCLA.

New instructors on the Whittier Campus for the spring semester include **Mr. Charles Adoff**, B.S. Cornell University, Business Administration; **Wayne Harvey**, '60 B.A. Whittier College, Business Administration; **Ralph Keegan**, A.B. UC Santa Barbara, M.A. USC, Physical Education; **James Rippy**, '63 A.B. Whittier College, B.S. USC, Mathematics; **Phillip Trapp**, A.B. UCLA, Business Administration. ■

H. Randolph Pyle Whittier is Copenhagen Director '66-'67

H. Randolph Pyle, professor and chairman of mathematics at Whittier College, has been appointed director of Whittier College in Copenhagen for 1966-1967 it has been announced by Dr. Paul S. Smith.

It will be the second time Dr. Pyle has headed the campus abroad program having served as director in 1963-1964. The fall semester at the University of Copenhagen will be the 8th year of the program and it is expected that 75 students will be enrolled in the foreign study program which opens with a three-week study tour September 12, 1966.

Dr. Pyle said applications from students are currently being accepted. He expects to enroll some 20 students from other colleges, including a dozen from Montclair State College, Upper Montclair, N.J., and several from Beloit College in Wisconsin. Beloit has been represented before. Montclair expects to enroll 20 in subsequent years.

Emphasizing that nine courses are offered, with each student taking only four or five, Dr. Pyle said that "students majoring in any department are eligible and that the advancement of study in their major sub-

ject will not suffer by taking a semester abroad."

The opening tour which is longer this fall includes Paris, Amsterdam, and London. As in former years, the mid-semester Berlin Seminar will again be held. Students may remain over for the spring semester which is sponsored by D.I.S. for Washburn University of Topeka. ■

Whittier Couple Honored

Kenneth and Dolores (Lathrup) Ball '34 were recently honored for their dedicated community service at one of Whittier City's largest social events of the year. Each year the Whittier Guild of Children's Hospital bestows the honor of King and Queen on a local couple at their annual Mardi Gras.

Dolores Ball has lived in Whittier since 1924 graduating from Whittier College in 1933. She received her Masters degree from USC, has taught high school classes and is a life member of PTA. Dolores is currently serving on the Board of Trustees of Whittier College.

Besides his busy life in the Whittier business community, Ken is a member of the Board of Directors of the Whittier College Associates and the Alumni Association of which he is a past president. He supports both the Boy Scouts and Cub Scouts and actively helps many other community groups. ■

Alumni Day Planned June 11

Alumni Day and Commencement have been scheduled this year for Saturday, June 11, 1966. The day will feature class reunions for the Classes of 1911, 1916, 1921, 1926, 1931, 1936, 1941, 1946, 1951, 1956 and 1961. Classmates will be invited to attend coffee hours, see campus development on campus tours, attend the Annual Alumni Day Luncheon and view the Sixty-third Commencement of Whittier College. A commitment for the commencement speaker will be forthcoming and will be announced at a later date. The Class of 1916 will be honored and will be installed in the Golden Anniversary Club of Whittier College. Plan to attend. ■

Seventh Whittier College Study Tour Leaves June 18

Dr. C. Milo Connick, Professor of Religion at Whittier College, will lead his seventh Whittier College Study Tour this summer to Europe and the Middle East with an optional World Tour Extension. The Europe-Middle East Tour will depart from Los Angeles on June 18 and from New York on June 20, for a seven-week exploration of Holland, England, France, Italy, Greece, Turkey, Lebanon, Syria, Egypt, Jordan, and Israel.

An unusual feature of the Study Tour consists of personal interviews with high-ranking officials abroad—U.S. Ambassador and Consul Generals and national leaders in government, education, communications, and religion. Already scheduled are appointments with ranking members of the Conservative and Labor Parties in England, French Foreign Office statesmen, His Holiness Patriarch Athenagoras, head of 200 million Orthodox Christians, in Istanbul, and Dr. Alisa Klausner Ber, Chairman of the Israel-American Friendship League, in Tel Aviv. Periodic group seminars help members to prepare for and to evaluate the interview sessions.

The Tour combines travel and study. Six academic credits, undergraduate or graduate, may be earned in the course *S180 Sociology of Religion* offered in connection with the Tour. But all is not study on this Study Tour. Tea in the House of Commons, a Shakespearean play at Stratford on Avon, an open-air opera at the Caracalla Baths in Rome, receptions, dancing, boating on the Bosphorus and on the Nile, kibitzing in the kibbutzim in Israel shopping in the exotic bazaars of Cairo and Damascus, swimming in the Dead Sea and the Sea of Galilee, riding horses to Petra ("the rose-red city half as old as time") and camels to the pyramids are but a few of the exciting activities in store for members. Those who leave the Tour at Tel Aviv may return directly to the U.S. or visit other countries en route home at no additional travel cost.

Those who continue on the World Tour Extension will spend thirty additional days in Iran, Pakistan, India, Thailand, Hong Kong, Formosa, Japan, the Philippines, and Hawaii. Stellar attractions will include the famous Peacock Throne, the Taj Mahal, the Holy Ganges, and the Emerald Buddha.

The Study Tour is not confined to college and university students.

It is open to anyone of good health and a congenial nature who has a lively interest in people, places, and points of view.

"What should people look for when they shop for a tour?" we asked Dr. Connick. "A tour that will really take off," he replied. "Nine out of ten announced tours never make it for want of members. Our record is enviable. This will be our seventh Tour, and we have never cancelled."

Interested Alumni and friends should write or phone Dr. Connick (OXbow 3-0771, Ext. 58 or OXbow 6-3208) for a free descriptive brochure. ■

Some Campus Changes . . .

Construction Progress

Construction of the new \$630,000 Dr. Frank Irwin Ball Residence for Women is in process on the east side of the Whittier campus. Collection and occupancy are scheduled for the fall of 1966.

Housing 89 women in 42 double and 5 single rooms, the new building is of contemporary design and features a spacious lounge on the west end which includes a fireplace, date rooms and a small kitchen. The lounge opens on both sides to adjacent terraces. The lower level extending the entire length of the building includes a library and study area, typing and study rooms, laundry facilities and recreation areas.

Designed by William H. Harrison and Associates, the new building will include 27,000 square feet. With the completion of this new residence the college will have in-resident housing for 1200 students.

College Acquires Murphy Memorial Hospital

The acquisition of Murphy Memorial Hospital by Whittier College has recently been completed for \$250,000. Murphy Memorial Residence Hall has been leased from the City of Whittier since 1964. The Murphy Hall facilities provide housing for 150 men students and meals are now served for 200 students on a regular basis. The purchase of this 7 acre area has enabled Whittier College to extend its campus to the North bounded by Hadley street. ■
